PORTABLE THREADING MACHINE MEPT-3X

MODEL MEPT-3X THREADING MACHINE

The MEPT-3X, complete with its 'Support Arm' and a durable carrying case, is the ideal portable power drive for maintenance and repair work. It's also an excellent choice for service plumbers who need reliable pipe threading capabilities for pipes of up to 2 inches in diameter.

CAPACITY

Pipe: 1/4" - 2" [6MM-50MM]

Dieheads : 1/2", 3/4", 1", 1 1/4", 1 1/2", 2"

SPECIFICATIONS:

Motor: MEPT-3X is 1700W input, 1020W output, Universal motor 110V or 220V, 50/60Hz.

The switch features a heavy-duty paddle-type design and incorporates a safety lock-off device that automatically engages to secure the switch when released, ensuring enhanced safety in professional applications.

Incorporating a distinct mechanical transmission FOR/REV switch and boasting a reverse speed three times faster than threading, this system is equipped with a gear head featuring a robust spur gear reduction/ring gear drive, all shafts meticulously ball and needle bearing mounted, and a permanently lubricated gear housing, showcasing professional-grade functionality and performance.

The gear housing is constructed from die-cast aluminum, while the body and handle are made from durable, heavy-duty fiberglass-reinforced plastic, ensuring high-quality materials for professional use.

Spindle Speed: 28 RPM for threading, 51 RPM reverse (No load)

Die Heads: 1/2", 3/4", 1", 1 1/4", 1 1/2", 2" (Type *11R)

Includes support arm.

Screw Threads: NPT / BSPT

Dies Material: Alloy standard, (HSS optional)

Die Head Adapter: Used with 1/2" through 1 1/4" die heads.

weight: 8 kg (power drive) , 22Kgs complete set

Length: 76 cm

COMPACT THREADING MACHINE FLARE.2C**MODEL FLARE.2C THREADING MACHINE**

Heavy-duty performance with 1500W motor. Portable/
Light-weight design.

Easy transport and set-up.

Self-Contained Oil System with adjustable flow control.

CAPACITY

Pipe: 1/4" -2"[6MM-50MM]

Bolt: 12MM-50MM

SPECIFICATIONS:

Motor: 1500W universal, 50/60Hz

Switch: Heavy-duty rotary Forward/off/reverse and integral foot switch.

Spindle Speed: 38 RPM.

Front Chuck: Hammer type with replaceable rocker action jaw inserts.

Rear Centering Device: Cam action.

Oiling System: Through the die head, with integral oil reservoir.

Pump: Self-priming constant flow, gerotor pump.

STANDARD SUPPLY ☒

Model FLARE.2C Threading Machine. (110 or 220V)

Self-opening die head-SDH15A (BSPT or NPT)

½"-¾" universal HSS dies set. (BSPT or NPT)

PORTABLE GROOVING MACHINE, COLT-6

The COLT-6 Roll Groover model stands out as the most durable and efficient lightweight (17kgs) portable grooving unit, making transportation easy. It boasts a robust cast-iron housing designed for heavy-duty usage. What sets the COLT-6 apart is its single stroke-feed mechanism, enabling precise and effortless operation. Additionally, the COLT-6 can be mounted on Macstroc's "Flare.2C and 3C" or optionally used with *Ridgid machine.

Capacity:

1¼"-6" Sch. 10 steel, stainless steel.

1¼"-3" Sch. 40 steel, stainless steel.

Standard dies: One 1¼"-6" Roll Groove Set.

(1¼"-6" Sch. 10, 1¼"-3" Sch. 40)

CODE	DESCRIPTION
COLT-6	ROLL GROOVER
KR6-1146	ROLL SET 1¼"-6"
MBH107	PIPE SUPPORT STAND(OPTIONAL)

PORTABLE GROOVING MACHINE, COLT-12

The Model COLT-12 Hydraulic Roll Groover Built with powerful 15-ton hydraulic ram, compact and easy to transport. One man set-up and operation, the COLT-12 is the ideal groover for work site. Designed to provide maximum efficiency, the COLT-12 is capable of grooving up to 12" Schedule 10 and 8" Schedule 40 standard wall pipes. Roll set changeout is accomplished in seconds.

The COLT-12 mounts quickly to Macstroc FLARE.4C machine.

Or optionally can be used in *Ridgid machines.

2-8 Sch. 40 steel, stainless steel

Weight: 53 kg

Standard dies:

One 2"-6" Schedule 10/40 Roll Set

One 8-12° Schedule 10 (8° Schedule 40) Roll Set

VERSATILE ROLL GROOVER, COLT-6GX / COLT-12GX

Model COLT6GX and COLT-12GX Roll Groovers are designed to groove manually or can be mounted on a threading machine. It is a highly versatile portable roll grooving machine suitable for medium-volume grooving both on the job site and for in-place pipe grooving. Users have the flexibility to utilize it either with the Macstroc Flare.2C threading machine, utilizing a chuck attachment, or, as an alternative, with a *Ridgid Threading machine. Additionally, it is well-suited for on-site manual roll grooving operations, operating autonomously without the need for an external power supply.

COLT-12GX is a heavy-duty design for fire-fighting and industrial pipe-lines in the size range of 1" to 12" (DN25 to DN300), SCH10 to SCH40. The presence of a groove depth lock nut guarantees the production of consistently high-quality grooves, resulting in enhanced grooving efficiency. Additionally, the machine facilitates rapid and effortless shaft swapping, with a process completion time of just 30 seconds.

PIPE CUTTING MACHINE, TERCEL.8 | TERCEL.12

The "Tercel.8" is an electro-hydraulic pipe cutter designed for cutting 2"-8" schedule 10/40 steel pipes or galvanized pipes. The "Tercel.12" is a heavy-duty electro-hydraulic pipe cutter suited for cutting 2"-12" schedule 10/40 steel pipes or galvanized pipes. Both models feature a hydraulic hand pump that allows for easy feeding, resulting in clean cuts with no sparks, abrasive dust, or open flames. The processed pipes can be further threaded or grooved, and the inclusion of a robust induction motor guarantees a noise-free operation.

The TERCEL.20 is a heavy-duty pipe cutter designed for cutting carbon steel pipes with a diameter range of 8" to 20" and a maximum wall thickness of 12mm. It is powered by a 1100W single-phase motor, with an optional 750W three-phase motor, and includes a pipe stand (MH98102) to support large pipes.

HINGED PIPE CUTTERS

The cutters operate with minimal cutter rotation (90-110 degree) as necessary for tight quarters, with four blades which Designed for rapid cutting of 1" through 8" steel, heavy-wall steel and cast-iron pipes. There is no sparks during cutting operation, serving jobs with such special requirements.

LOW CLEARANCE ROTARY PIPE CUTTER

The tool's long handle provides good leverage, allowing it to snap pipes squarely before the cutter wheels penetrate halfway. It offers a clean cut and can be used in tight spaces like ditches, underwater, noise-free zones, overhead, and in pipe racks. It operates with minimal rotation (45 degrees) and is suitable for cutting steel, cast iron, galvanized, ductile iron, black iron, and stainless steel pipes.

ROTARY PIPE CUTTER

The Macstroc Rotary pipe cutter, designed for extremely low clearance and up to 36-inch pipe diameter, efficiently cold cuts steel, galvanized, and black iron pipes in tight spaces without producing debris, sparks, or significant heat, delivering a precise cut suitable for confined spaces such as trenches, underwater environments, noise-sensitive areas, overhead applications, and pipe racks.

Note: HD cutting wheels are for thick-wall pipes. Replace the rollers simultaneously when replacing the HD cutting wheel.

Size	H-513mm ; L-260mm ; W-248mm
Net Weight	16Kgs

HOLE CUTTING MACHINE, FERRO.6

Model FERRO.6 is designed for drilling holes up to 6"(152MM) into steel pipes. The 'Ferro.6' has a 5/8" (16mm) capacity drill chuck to use all sizes of hole saws and hole saw arbors. An integral motor and gear reduction optimizes performance of large diameter hole saws. Two way feed handle can operate the tool from either left or right .

HYDRAULIC BUTTFUSION MACHINE, MACFUSION

The Macstroc MacFusion Series Butt fusion machines are designed for precision butt welding of plastic pipes and fittings made from PE, PP, and PVDF materials. This advanced series features a robust basic frame, a hydraulic unit, a planing tool, a heating plate, and a basket, with optional parts available for enhanced functionality. The removable PTFE-coated heating plate offers precise temperature control, ensuring consistent and high-quality welds. With low starting pressure, these machines guarantee reliable welding for small pipes, while the adjustable welding position allows for the easy handling of various fittings. Equipped with a high-accuracy, shockproof pressure meter and a dual-channel timer that records soaking and cooling times, the MacFusion Series delivers superior performance and efficiency in all welding operations. *An optional facility to connect a data logger can be added to MacFusion machines.

INVERTER ELECTROFUSION WELDER, MEFWELD

The MEFWELD series from Macstroc is an advanced line of inverter-type electrofusion machines designed for efficient and reliable welding operations. These machines utilize a digital MCU as the control core, offering robust parameter settings, detection, and protective functions. With a high-brightness, multi-language LCD for an intuitive human-machine interface, they are user-friendly and adaptable to various environments. The 20% wide voltage supply input ensures compatibility with complex construction site power requirements, while their swift output response time provides high stability during power interruptions.

The MEFWELD series offers precise control, guaranteeing top-notch welding quality. Additional features include USB support for importing and storing welding records, manual input through a keyboard or barcode scanner, and automatic retrieval of pipe fittings for enhanced operational efficiency.

HAND + POWER SPINNER

Drain Size: Cleans drain lines from 20mm-75mm [3/4"-3"] in diameter.

Unique design : Can connect with any Power drills or spin the drum manually.

Flexible soft shafts : are put in large metal drum to ensure cleaner and more convenient use.

Auto-Feed : It allows cable to self-feed down the drain.

Simple in structure and easy-to-handle: Release the locking screw, insert a soft shaft of certain length into the pipe. latch the lock and rotate the handle, and press it, repeated operation will easily remove the pipe blockages.

It can also be driven by any Power drills.

DRAIN CLEANING MACHINE , XDM-K50

- XDM-K50 is Lightweight, strong, versatile and Portable design suitable for drain lines of Ø20-100mm (3/4"- 4") .
- Uses different cables of Ø8mm (5/16") and 16mm(5/8"). Soft shaft MF-2-A Ø8mm (5/16") best for Ø20-50mm drains.
- Uses Sectional Helical flexible shaft Ø16mm (5/8) best for Ø32-100mm(1-1/4"-4"). The sectional cables can be extended as required.
- Cable clutch ensures operator control, pull handle down and cable spins speed at 400 RPM, and the soft shaft stops when the handle is released.
- Equipped with 390W motor.
- Rated Voltage:220V (110V optional) 50Hz,60Hz.

DRAIN CLEANING MACHINE , XDM-K150

- XDM-K150 is multifunctional and strong design suitable for drain lines of Ø20-150mm (3/4"- 6") .
- Uses different cables of Ø8mm (5/16") ; 16mm(5/8") and Ø22mm(7/8") .
- Ø8mm cable best for 20-70mm pipes, Ø16mm best for 32-100mm pipes, and Ø22mm use for 50-150mm pipes.
- Cable clutch ensures operator control, pull handle down and cable spins speed at 400 RPM, and the soft shaft stops when the handle is released.
- Support is provided to adjust the height angle of the machine for different work environment.
- Equipped with 570W motor.
- Rated Voltage:220V (110V optional) 50Hz,60Hz.

STANDARD SUPPLY—XDM-K150

AUTOMATIC DRUM TYPE DRAIN CLEANER, -XDM-K100A

- XDM-K100A is applicable for drain lines of Ø32-100mm (1-1/4"- 4") .
- Automatic cable feed powers the cable into and out of the drain. The direction of the feed device is reversed and the cable is returned to the drum.
- Built-in with ground fault circuit interrupter and air footswitch for more easy & safe operation.
- Drum spins at 300RPM, Equipped with 390W motor.
- Built with 8" rubber wheels and removable handle. Entirely sealed structure and the shafts are comfortably put in the drum.
- Rated Voltage:220V (110V optional) 50Hz,60Hz.

POWER DRAIN CLEANING MACHINE, -XDM-K200

- XDM-K200 is applicable for all kind of outdoor drains of Ø50-200mm (2"- 8") . It is heavy-duty and unit has wheels to move.
- Inbuilt drill hanging rack for keeping augers and cutters.
- Uses Ø30mm cable (1-1/4") for drains 50-200mm . Cables are extendable.
- Cable clutch ensures operator control, pull handle down and cable spins speed at 700 RPM, and the soft shaft stops when the handle is released.
- Equipped with 1100W motor.
- Rated Voltage:220V (110V optional) 50Hz,60Hz.

PIPE BEVELING MACHINE, M-BEVELER

The ID mounted Macstroc PIPE BEVELING MACHINES are Handy and lightweight portable beveller designed to create a perfect weld prep edge prior to joining. Machines be used efficiently by a single operator onsite, suitable for facing and bevel all type of pipe ends, pressure vessel and flanges. The "T" shape design of machines to work in the minimal radial working space. The machine is applicable in various grades of metal pipes, such as carbon steel, stainless steel and alloy steel.

PIPE BEVELING MACHINE, MSY-BEVELER

The MSY-Beveler is designed to face and bevel various types of pipe ends, pressure vessels, and flanges. Its "Y" structure minimizes radial working space, making it lightweight and portable for on-site operations. It is suitable for machining the ends of metal pipes, including carbon steel, stainless steel, and alloy steel, commonly used in heavy-duty pipelines.

FEATURES

This machine features an ID-mounted "Y" structure, capable of U, Single-V, Double-V, and J beveling, with a working range of 60–820mm. It is suitable for repairing inner walls and deep holes, powered by either pneumatic or electric motors.

AUTO FEED PIPE BEVELING MACHINE, MAFB -BEVELER

The Macstroc® MAFB beveler is purposefully designed for end beveling in confined spaces and for small diameter pipes. Featuring OD mounting and a single clamping block tailored to each pipe size, it ensures secure clamping and automatic feeding for effortless operation. With its **Metabo®** motor, it is extensively utilized across various industries including water walls, fins, boiler economizers, and power plants for precise beveling of single pipes and exhaust pipes. Notably, its cold cutting capability guarantees material integrity while its lightweight aluminum body makes it ideal for aloft work.

SPLIT FRAME CUTTING AND BEVELING , MSCB

This machine is specifically designed for pipe fitters and welders engaged in weld preparation. It features a smart design, allowing it to split in half at the frame, making it easy to install on pipelines. As the most compact and small-sized split-frame clamshell model available, it is ideal for use in tight spaces such as exhaust pipes, elbows, and pipe racks, avoiding any interference during operation.

Features

The machine boasts an innovative design that is compact and cleverly engineered to avoid interference, making it ideal for tight spaces. Constructed with a lightweight aluminum body, it allows for easy, one-handed operation. The split-frame technology ensures simple installation on pipelines, while its versatile design supports multiple beveling shapes, including "U," "V," and "J." Additionally, non-standard models can be customized to meet specific needs.

INDUSTRIAL CUT-OFF SAWS 16" (400MM)

Macstroc® cut-off saws are built purely for industrial use, with heavy-duty 3PH or 1PH induction motors and 400MM Abrasive wheel useful in various industries. High power motor provides outstanding performance for cutting of materials with high toughness and tenacity. The machine can cut directly at 90°, or unilaterally cut 45° to 90°, left and right.

MAGNETIC DRILLING MACHINE 35MM, STROC.35HV

Macstroc® Magnetic drill model 'STROC.35HV' for industrial use, it has a cutting capacity of up to 35mm with an integral auto-cooling function and a powerful new hi-torque motor.

KEY FEATURES

- ☒ Variable Speed
- ☒ Extendable height up to 220mm from work piece to spindle, enables to attach twist drill chuck and other accessories easily.
- ☒ High accuracy and low maintenance
- ☒ Minimal vibration, weighs only 11kg

**TECHNICAL DATA**

Annular cutting	Ø12-35 mm
Twist drilling	Ø1-16 mm
Countersinking	Ø10-40 mm
Length & width	210 & 290 mm
Height	380-590mm
Stroke	220 mm
Magnetic force	1300 KG
Magnet [L x W x H]	165 x 85 x 50 mm
Motor Power	1100W
Total Power	1150W
Speed (no load)	200-750 R/min
Spindle	19.5mm [Weldon]
Voltage	220-240V / 50-60Hz 110-120V / 50-60Hz
Weight	11 kgs.

OPTIONAL ACCESSORIES

CODE	DESCRIPTION
CHUK13-A	13MM / 1/2"x20 UNF keyless
MZXU-01	Adapter For twist-drill chuck 1/2" x 20 UNF - WELDON

MAGNETIC DRILLING MACHINE 50MM, STROC.50HV

Macstroc® industrial Mag-drill 'STROC.50HV' has a cutting capacity of up to 50mm with stepdown gear box , integral auto-cooling function, and supplied with external cooling device. STROC.50HV is equipped with a powerful motor, variable speed function, and the design ensures stable support, faster drilling times and more accurate hole sizing.

KEY FEATURES

- ☒ Variable Speed , Step down gear box
- ☒ Stroke up to 220mm from work piece to spindle, enables to attach twist drill chuck and other accessories easily.
- ☒ Ensures stable support, faster drilling, low maintenance.
- ☒ Minimal vibration, high accuracy and more cutter life.
- ☒ MT3 spindle with integrated tool cooling and lubrication

Weight	11 Kgs

MAGNETIC DRILL W/TAPPING 60MM, STROC.60HVT

Macstroc® industrial Mag-drill 'STROC.60HVT' is suitable for both drilling and tapping. Cutting capacity of up to 60mm with stepdown gear box, integral auto-cooling function, and supplied with external cooling device. Heavy-duty, variable speed function, and the design ensures stable support, faster drilling times, more accurate hole sizing and more cutter life.

KEY FEATURES

- ☒ Variable Speed, Step down gear box, reverse function for tapping.
- ☒ Stroke up to 220mm from work piece to spindle, enables to attach twist drill chuck and other accessories easily.
- ☒ Ensures stable support, faster drilling, low maintenance.
- ☒ Minimal vibration, high accuracy and more cutter life.
- ☒ MT3 spindle with integrated tool cooling and lubrication and external cooling device

Magnetic force	1800KG
Motor power	1800 W
Speed (no load)	260/460 rpm
Spindle (Weldon)	MT-3 [19,05 /31.75mm]
Voltage	220 - 240 V / 50 - 60

MAGNETIC DRILL 120MM, WITH TAPPING MT-4 ARBOR, STROC.120

TECHNICAL DATA	
Annular cutting	Ø 12 - 120 mm
Twist drilling	Ø 38mm
Countersinking	Ø 10 - 120 mm
Tapping	M3-M42
Length	440 mm
Width	230 mm
Height	660 - 750 mm
Stroke	210 mm
Magnet (l x w x h)	330 x 110 x 60 mm
Magnetic force	2400KG
Motor power	1800 W / 2050 W
Speed (no load)	82/180/245/535 RPM
Spindle (Weldon)	MT-4 / MT-3 [19,05 /31.75mm]
Voltage	110 - 120 V / 60 Hz 220 - 240 V /50-60 Hz
Weight	33 kgs

HSS ANNULAR CUTTERS –30MM LONG, MACSHANK

MAC-SHANK Annular cutters from MACSTROC, which is a combination of "Weldon-shank" and "Universal-shank" Annular cutters. It has set 90° Flats for grub screws in traditional "Weldon-shank" machines and one-touch grooves for Quick connect. Macstroc annular cutters are superior with it's quality which provide 2X life and the fastest cut. It fits into 90% of Magnetic drilling machines, as well as other stationary machines. A special formula used in the cutters, reduces the risk of breakages.

KNOW—WHAT IS MACSHANK ?

MACSHANK IS A COMBINATION OF A WELDON AND UNIVERSAL SHANK FOR ANNULAR CUTTERS. IT CAN BE USED IN 90% OF MAGNETIC DRILLS.

2X LIFE : IT HAS TWICE THE LIFESPAN, IS FASTER, AND REDUCES THE RISK OF BREAKAGE.

S - SERIES TCT ANNULAR CUTTERS 35MM

THE SHANK IS AVAILABLE IN EITHER WELDON OR UNIVERSAL DESIGNS

Macstroc tungsten carbide tipped (TCT) annular cutters are designed for durability and exceptional performance, making them ideal for cutting hard and high-tensile steel, stainless steel, and rail steel. They also excel in working with challenging materials, including non-ferrous metals and alloys, ensuring precision and long-lasting use across a wide range of applications.

COBALT ANNULAR CUTTERS

Macstroc COBALT 5% **grade M35** Annular cutters have additional cobalt added for much greater wear resistance, although harder, will give longer cutting life in mild steel and better performance in more difficult materials. The extra added cobalt enables to drill in Stainless steel tough & harder steel easily. Available in weldon shank and universal shank. Macstroc also produces 8% cobalt cutters with **grade M42**

RAIL DRILLING - TCT ANNULAR CUTTER

Macstroc TCT annular cutters for Rail drilling, made of special carbide tips and superiorly designed to work in hardened rail and normal rail. Macstroc TCT rail cutters, provides maximum steadiness and power, and these cutters can drill the most high-tensile rail tracks. Macstroc also offers Solid twist drills (weldon shank) to work in rail tracks.

PORTABLE REBAR BENDING MACHINE

The Macstroc rebar bender's robust design and technology streamline the bending process, ensuring seamless integration into construction workflows. Its user-friendly interface and durable construction make it a reliable choice for professionals looking to enhance efficiency and accuracy in reinforcing steel bending on the job site.

PORTABLE REBAR CUTTING MACHINE

The Macstroc rebar cutting machine is a cutting-edge solution for the construction industry, designed to provide efficient and precise cutting of reinforcing steel. With its powerful motor and advanced cutting mechanisms, this machine ensures clean and accurate cuts, contributing to increased productivity and safety on construction sites. Its user-friendly features and durable build make the Macstroc rebar cutting machine a reliable choice for professionals seeking a high-performance tool for rebar processing.

MACSTROC WARRANTY

WHAT IS COVERED

All Macstroc electric machines come with a standard 12 months manufacturer's warranty in accordance with the following provisions:

Macstroc issues the warranty by undoing malfunctions free of charge that clearly presented themselves in the warranty period and which follow from faulty material or a manufacturing error. The standard warranty period is 12 months, commencing upon the first user's acquisition. The decisive factor is the purchasing date stated on the original proof of purchase. Macstroc shall undo the malfunction by repairing or replacing the failing machine, or parts thereof, at its discretion, without charging labour costs or costs for parts. Macstroc may replace malfunctioning machinery or parts thereof by new or reconditioned machinery or parts thereof. All machinery and parts replaced become property of Macstroc.

HOW YOU CAN GET SERVICE

The warranty claim must be lodged within the warranty period. This requires the submission or sending of the complete tool in question with the original sales receipt, which must indicate the purchase date and the product designation, must be submitted to the Macstroc distributor in your country. The distributor Service Center should be notified in writing of any additional accessories installed in the machine.

NORMAL WEAR AND TEAR

The Warranty does not cover consumables or parts of limited regular functionality due to their natural wear and tear. The Warranty does not cover for Mechanical or electric damages resulting from incorrect installation, operator's misuse or other activities inconsistent with the operation manual or contradictory to technical specifications attached to the machine.

USE GENUINE PARTS !

Use only accessories that are recommended by Macstroc for your model. Warranty does not cover if you are using any additional accessories on machines without prior approval of authorised Macstroc distributors.
